An Approach Towards Edge Computing of Distributed Sensors Data Through Opportunistic Networks

Aly Saleh

November 8, 2016

Contents

1	Introduction						
	1.1	Introduce Iot and distributed sensor networks	3				
		1.1.1 Show how lot is being currently used, its pros and cons	3				
		1.1.2 Give an idea about the devices used to make a distributed sensor network	3				
	1.2	Motivation	3				
		1.2.1 Show the need to explore Pervasive Computing	3				
		1.2.2 Illustrate why it might be better to distribute the data in some cases rather than					
		accumulating it in a single server	3				
		1.2.3 Explain why Cloud Computing is not always the right solution in some cases	3				
		1.2.4 Explain the need to find IoT devices capabilities and limitations when used for					
		data computation	3				
	1.3	Scope & Problem Statement	3				
		1.3.1 What do we want to do in this thesis	3				
2	Bac	ckground & Related Work					
	2.1	Introduce Edge, Fog and Pervasive computing, how they are used in this context	3				
	2.2	Explain how sensor data is modeled and distributed in the current published approaches	3				
	2.3	Illustrate what are the ideas and possible network mechanisms and protocols that could					
		be used data transfer	3				
		2.3.1 Server To Server	3				
		2.3.2 Server To Device	3				
		2.3.3 Device To Device	3				
	2.4	Explain Opportunistic networks and SCAMPI architecture	3				
	2.5	Show other approaches in the literature	3				
3	App	oroach	3				
	3.1	Modeling of Input Sensor Data	3				
		3.1.1 Show how the different sensors have data been modeled to fit our requirements					
		for further use in computations	3				
	3.2	Data Distribution Mechanism Across Different Nodes	3				
		3.2.1 Explain data distribution among several nodes to apply pervasive computing	3				
	3.3	Moving Data Through the Network	3				
		3.3.1 Explain how the data travel around the network, which protocols was used and					
		why	3				
	3.4	Pushing the Computation to the Edges "Nodes"	3				

		3.4.1 Explain the data computation in the nodes, how it is design	ned to fit our	needs		3
	3.5	5 Overall System Design				3
4	Eva	valuation				3
	4.1	1 Use Case Implementation				3
		4.1.1 Explain why did we choose this specific use case in particul	lar			3
		4.1.2 Explain the Implementation				3
	4.2	2 Implementation Evaluation				3
		4.2.1 Show that the implementation is a proof of concept that th	ne approach is	s sound		3
		4.2.2 Show why specific implementation details where chosen over	er others			3
	4.3	3 Performance Tests				3
	4.4	4 Limitations			•	3
5	Con	onclusion				3
	5.1	1 Summary				3
	5.2					3
6	Ref	eferences				3
